PUBLIC NOTICE

Discoloured water

Cloncurry Shire Council advise the community that they may experience discoloured water.

Council is conducting further investigations as to the cause of the discolouration.

Council reassures residents that the water is safe to drink. Routine microbiological tests show that the water is free of coliforms and e-coli. Chlorine dosage rates are also meeting the Australian Drinking Water Guidelines.

Council is increasing the frequency of testing to ensure that the water remains suitable for human consumption.

Council appreciates your patience during this time.

Should you have any queries in respect of this matter, please contact Director Works and Environmental Services, Peter Fitchat, on 07 4742 4100.

Yours faithfully
