PUBLIC NOTICE

Mosquito Control

Council will be implementing a mosquito control program which is scheduled to begin on Saturday 11 March 2017 and will continue through to Tuesday 14 March 2017 (inclusive).

This program will include the following activities:

- Surface spray and thermal fogging in identified areas
- Placing insecticide briquettes in large volumes of standing water
- Placing insecticide sand in small volumes of standing water

The program will be delivered between the hours of 3.30am-6.30am and 6.30pm-9.30pm. These allocated times have been arranged to target the most active times for the presence of mosquitoes as well as to minimise contact between the general public and the chemicals employed.

The chemical which is to be used is called Phenothrin (Twilight ULV, Pacific Biologics). Material Safety Data Sheets (MSDS) can be viewed by visiting Council or via the following webpage: www.pacificbiologics.com/images/files/msds/Twilight%20MSDS%201111.pdf

This product will have minimal effect on residents and their pets. Council recommends residents have limited contact with this product and suggest that the following measures be taken prior to any application:

- Take time to read through the MSDS and advise Council of any concerns you may have
- Stay inside during treatment hours
- Keep windows and doors closed during treatment hours

Council apologises for any inconvenience that this may cause and appreciate your patience during this time.

Should you have any queries in respect of this matter please contact Council’s Environmental Health Technical Officer on 4742 4100.

Ben Milligan
Chief Executive Officer
