PUBLIC NOTICE

Water Main Replacement – Alice Street

Council wish to advise that there will be works carried out to replace the water main which services houses on Alice Street between Isley and King Streets. The purpose of the replacement is to improve the integrity of the infrastructure, in turn enhancing the water quality provided to the community.

Works will be carried out from Wednesday 19 April 2017 to Saturday 29 April 2017 (inclusive). During this time residents will experience water interruptions, noise from machinery and limited change to traffic conditions.

Residents are also advised that Council may be required to cut through any concrete driveways in order to access and replace the water main. Council expects to restore driveways within two weeks following the project.

Council requests that all vehicles that are parked on the footpath or in the driveway within the footpath boundary, are removed from the area prior to commencement of work.

Once the water is restored, residents and businesses may experience slight water discolouration.

Should you have any queries in respect of this matter, please contact the Water and Sewerage Supervisor at the Council Administration Office on 4742 4100.

Ben Milligan
