PUBLIC NOTICE

Water Discolouration Update

As of Thursday 16 August, Cloncurry Shire Council has recommenced pulling the town water supply from our usual water sources.

The change in water source has resulted in significantly improved clarity of water. The water treatment plant and residents should notice improved water aesthetics within their property as the clean water makes its way through the water network.

In an effort to expedite the discoloured water from the network, Council will be continuing its water main flushing regime over the next few days.

Once again, Council appreciates your patience during this time.

Should you have any queries in respect of this matter, please contact Council on 4742 4100.

Joanne Morris
Acting Chief Executive Officer
