## Introduction

### Purpose of the Operational Plan

The annual Operational Plan sets out the activities that Council will undertake during the year to deliver the outcomes of the Corporate Plan. The deliverables in the Operational Plan inform the budget for the relevant financial year.

Together the following integrated documents form the local government's system of financial management:

- Corporate Plan 2021-26 incorporating community engagement.
- Long-term asset management plan and long-term financial forecast.
- 2022-23 annual budget and annual Operational Plan.

The Chief Executive Officer must present a written quarterly progress report to Council outlining progress towards implementing the annual Operational Plan. Council may amend the Operational Plan during the year by resolution.

### How we manage risk

The annual Operational Plan must state how operational risks are managed. Council manages risk through various instruments and frameworks, each of which has a governance regime to implement, monitor, review, and report on the various risks we face and how they are being mitigated. The requirements to manage these instruments and frameworks are outlined in the Operational Plan, with timeframes and accountabilities detailed throughout. Some of the key risk management instruments and frameworks are identified below.

Framework	Purpose
<b>Asset Management Plans</b>	Council's asset management plans ensure Council plans for the future maintenance, renewal and replacement of assets, as well as the implications of upgrades and new asset acquisitions.
<b>Business Continuity Plan</b>	Addresses the risks associated with continuation of the business of council in the case of a business disruption event.
<b>Strategic and Operational Risk Register</b>	Lists the various risks to Council's business, with mitigating strategies.
<b>Insurance</b>	Council maintains a wide-range of insurances (PL, PI, LGW, Cyber, project-based) to mitigate against the risks Council faces in day-to-day and project-specific activities.
<b>Internal Audit</b>	Internal auditing is an independent, objective assurance and consulting activity designed to add value and improve an organisation's operations. It helps an organisation accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.
<b>Audit Committee</b>	Section 105 of the <i>Local Government Act 2009</i> requires Council to establish an Audit Committee to monitor and review the integrity of financial documents; the internal audit function; and the effectiveness and objectivity of the local government's internal auditors.
<b>External Audits</b>	The external audit provides independent assurance that Council's annual financial statements are reliable and comply with prescribed requirements. It is primarily a financial audit which assesses Council's internal control framework and focuses on the material components of council's financial statements and how significant financial reporting risks have been dealt with by management.
<b>Project Assessment Framework</b>	Council utilises the QTC and Building Queensland project assessment frameworks to drive consistency and best practice in project selection and development.
<b>Local Disaster Management Plan and Emergency Action Plans</b>	Addresses risks associated with natural disasters as well as specific risks associated with dam infrastructure.
<b>Fraud Risk Framework</b>	Comprises a fraud and corruption control plan and associated supporting documents including a fraud risk register to mitigate the risk of fraud and corruption within and against the Council.
<b>Training and Development</b>	Council invests in the training and development of its staff to ensure staff are aware of the risks associated with their roles and are equipped to manage and mitigate these risks.

## Investing in our Communities, People & Lifestyle
