

PUBLIC NOTICE

Cloncurry Overnight Water Outage 19 December 2024 Coppermine Creek Bridge Water Main Works

Cloncurry Shire Council will be carrying out water service repair works to the town's water main that crosses Coppermine Creek.

WATER OUTAGE SCHEDULE	
Night Works	11.00pm Thursday, 19 December 2024, to 4.00am Friday, 20 December 2024

All properties in the Cloncurry township on town water will lose water during the works.
See Figure 1.

Once the water is turned back on, pressure in the line will be increased gradually. Water pressure should be back to normal by 6:00am.

Following the works, the lines will be flushed for 15-20 minutes until the water is clear. If you notice discoloured water, run the tap nearest the water meter for up to 5 minutes until the water runs clear. Then run the tap inside for up to 5 minutes, until the water runs clear.

This will be the final water shutdown for the year. However, the Coppermine Bridge Replacement project presents an opportunity to renew and upgrade nearby water assets, so there will be a number of other water outages in 2025. Notice will be given for these outages closer to the outage.

Should you have any questions or concerns in respect of this matter please contact Council's Administration Office, on 07 4742 4100 or council@cloncurry.qld.gov.au
