

PUBLIC NOTICE

Weed Management Program September – October 2024

Cloncurry Shire Council wishes to advise that Biodiversity Australia has been contracted to deliver a weed management program, as part of the Council's commitment to its environmental management and biosecurity obligations.

Weed management activities will be carried out along the Cloncurry River, Coppermine Creek and on the fuse plug and levee wall of the Chinaman Creek Dam (See Figure 1) from now until the end of October 2024.

Biodiversity Australia is a specialist vegetation management contractor with suitably qualified and experienced technicians conducting the work. There will be sufficient signage set up at work locations to notify of any active weed management works.

The weed management works include treatment of selected identified weeds by application of approved herbicide spraying, direct herbicide application, and use of chainsaws where necessary.

Should you have any questions or concerns in respect of this matter please contact Council's Planning and Environment Manager, Megan Anderson, at this office.

Philip Keirle
Chief Executive Officer
6 September 2024
